

Instituto **Thomas Jefferson**

CAMPUS GUADALAJARA -
PALOMAR

Introduction

Faced with the health contingency due to COVID-19, the Thomas Jefferson Campus Guadalajara - Palomar Institute needs to apply and extend the Health and Hygiene protocols, in order to comply with the rules indicated by official authorities. This will allow the return to face2face classes and provide a safe environment for the ITJ family within the facilities.

At the access controls, there must be informative signage that will indicate the steps to follow to enter the facilities. This access control contemplates the correct and mandatory use of mouth pieces , application of antibacterial gel, temperature measurement, sanitization of footwear and respect for the social distance signage placed on the floor.

Government guidelines stipulate that the supply of water and antibacterial gel must be ensured, for this reason it is required to place Hygiene Modules that have mobile sinks, antibacterial gel, and baskets for the disposal of mouth pieces and gloves.

In preschool classrooms, cafeteria, and administrative offices for customer service (front desk, cashier, and school control), it will be necessary to place acrylic screens to avoid direct contact between people.

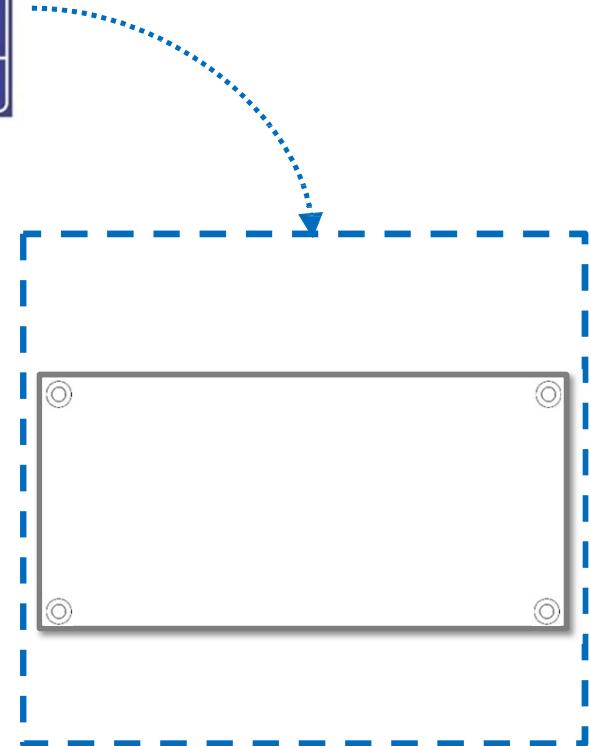

Access Control

Access signage

Amount: 5 pieces

In order to inform the entire ITJ community in a pertinent and effective manner, 1 x 1 meter tarps will be placed at the main entrances of the campus, these will indicate the access protocols to the facilities.

EXTERIOR

Signage location

As a measurement to facilitate and promote continuous sanitation, sensor-operated antibacterial gel dispensers will be placed to dispense automatically and avoid direct contact.

Pedestal with thermometer and automatic gel dispenser

Amount: 5 pieces

- ✓ Temperature Alarm
- ✓ Rechargeable
(duration 1 week)

With
sensor

EXTERIOR

Location Pedestals

Infrared thermometers will be used to take body temperature from a distance. These will be used in each of the school sections to monitor the temperature of the students and, as stipulated in the protocol, the procedure must be carried out before the students descend from their vehicle.

Thermometers

Remote infrared

Amount: 60 pieces

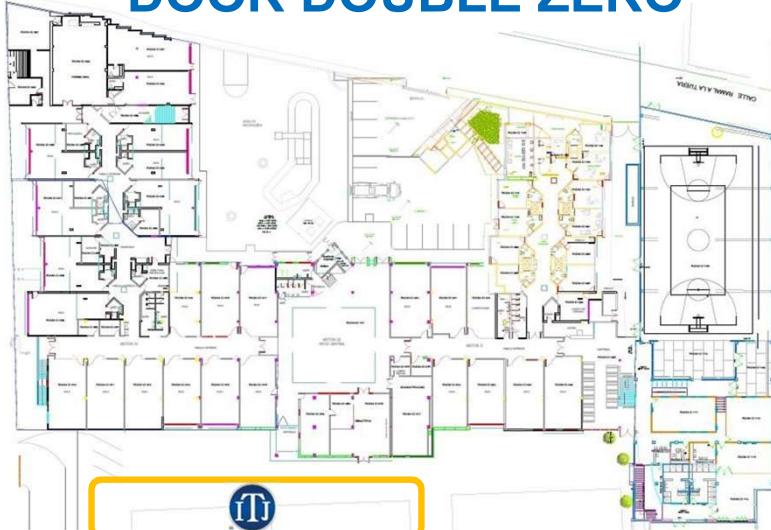

✓ Warning sensor 38°C

✓ Avoids direct contact

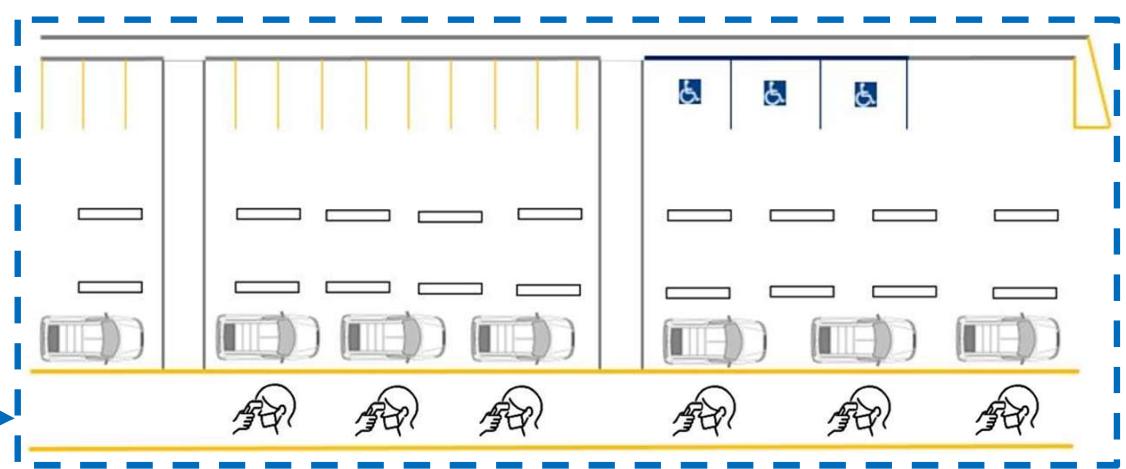

EXTERIOR

DOOR DOUBLE ZERO

Remote Infrared Thermometer Usage

In compliance with the regulations of the authorities, sanitizing mats will be placed at the facilities accesses, this is a preventive measure to avoid the entry of viruses or bacteria through footwear. Anyone who enters the campus must go through them without exception.

Sanitizing Mats

Amount: 6 pieces

Apply Alpha HP
Sanitizer

EXTERIOR

Location Sanitizing Mats

Complying with government guidelines, heavy-duty, self-adhesive, vinyl signs will be placed on the floor at the main entrances, driveways, bathrooms, cafeteria, and common spaces to mark the social distance.
